

Bona Novia

Setting new standards

Bona®

Bona Novia

Setting new standards, Bona Novia is the optimal solution for today's conscious craftsman.

With our new self-sealing technology, no primer is needed. This newly developed technology makes Bona Novia both time saving and easy to apply.

The results on the wood are outstanding. The finish brings out an even, warm colouration with its waterborne environmentally sound formula. With an excellent and fast resistance to scuff marks and great resistance to household chemicals, Bona Novia is the all-round star for modern living environments.

Deep Colouration

Applied on bare wood, Bona Novia brings out a nice, warm tone in many wood species. This colouration is unique in the segment of waterborne finishes and primers.

Time Saving

Bona Novia is quick drying and self-sealing, meaning it can be used both as a base and top coat (no primer needed). This makes finishing the floor faster and easier.

Scuff Mark Resistant

The scuff mark resistance is excellent and very fast meaning it can handle foot-traffic with shoes already the next day.

Environmentally Sound

Bona Novia is based on new, innovative crosslinking polymer technology. It is a waterborne finish, with low VOC and no smell. Additionally, it is completely free from NMP and NEP.

Bona Novia at a glance:

- Self-sealing and time saving.
- Deep colouration.
- Excellent and fast scuff mark resistance.
- Environmentally sound.
- Good wear resistance.
- Good resistance to common household chemicals.
