

BONA PARKETT REPAIR

Product Description & Sitework

Features

Parkett Repair is a waterborne, ready-to-use repair paste designed for filling minor gaps in parquet flooring and correcting dents and cracks in parquet, pre-finished parquet and laminate flooring.

- Very elastic
- Possible to maintain with polish
- Available in 6 colours, which can be mixed

Application

The paste can be easily applied using the fingers or a plastic trowel. Larger gaps or dents may need to be filled more than once. Remove any excess using a slightly damp cloth. Repair should not be used at a room temperature below +10°C.

To get a more dirt-repellent surface a thin layer of a Bona maintenance product should be applied after drying.
